

Anjali Sharma

+91 7331137060 | as8736512@gmail.com | Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

Passionate **Gen AI and Full Stack Developer** dedicated to building innovative solutions that bridge technology and real-world problems. Skilled in developing scalable web and AI applications integrating front-end, back-end, and generative AI capabilities. Enthusiastic about creating impactful digital experiences that combine creativity and intelligence.

EDUCATION

Malla Reddy University <i>B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning)</i> – CGPA: 9.3/10 (Current as per 3rd Semester) – Relevant Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures, Algorithms, Web Development	Hyderabad 2023 – 2027
Narayana Junior College <i>Intermediate (Board of Intermediate Education, Telangana)</i> – Percentage: 97%	Hyderabad 2021 – 2023
Adarsh Vidyalaya High School <i>SSC (Telangana Board)</i> – CGPA: 10/10	Rangareddy 2020 – 2021

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, TypeScript, Java
- **Frontend:** React, Next.js, HTML5, CSS3
- **Backend:** Node.js, Express.js, Flask, PHP
- **Databases:** MongoDB, MySQL, Firebase
- **AI & ML:** TensorFlow, Scikit-learn, OpenCV, Generative AI (Gemini API, RAG, Agentic AI)
- **Tools & Platforms:** GitHub, Docker, Vercel, Google Cloud, VS Code, Figma, Canva

EXPERIENCE

Member <i>Innovation & Entrepreneurship Cell, Malla Reddy University</i> – Contributed to fostering innovation and entrepreneurial spirit among students through workshops and mentorship programs.	Present
Organizer <i>GDGoC MRUH (Google Developer Group on Campus, Malla Reddy University)</i> – Led and organized multiple tech events and workshops focused on Google technologies. – Guided participants and managed event logistics for smooth execution.	Present

PROJECTS

Helmet Detection App

AI-powered application to enforce safety helmet compliance

- Built using TensorFlow, Flask, and React to detect helmet usage in real-time.

Marketing Campaign Analysis

Optimizing Customer Engagement Through Marketing Campaign Data

- Used Python and ML models to analyze customer engagement and campaign success.

Soil Moisture Analysis

IoT and ML model for precision irrigation in smart farming

- Implemented ML models with TensorFlow Lite and Python for moisture prediction.

Crop Yield Prediction

Forecasting agricultural outputs using time-series ML models

- Developed using Scikit-learn and Pandas for data-driven yield forecasting.

Crop Disease Detection

AI image classification system for identifying plant diseases

- Developed using Python, TensorFlow, and OpenCV to identify crop diseases.

AI Chatbot with Gemini API

Intelligent conversational agent powered by Google's Gemini API

- Developed using JavaScript and Node.js for real-time interactive AI conversations.

ACHIEVEMENTS

- **Organizer – GDGoC MRUH:** Successfully led multiple Google Developer Group events, building a strong developer ecosystem.
- **Founder & Developer – Rivaaz:** Created an innovative smart event planning platform that connects vendors and customers, enabling real-time tracking and budget-friendly packages.

STRENGTHS

- Innovative problem-solving and creative thinking
- Strong leadership and teamwork
- Passionate about technology and continuous learning

PERSONAL INFORMATION

- **Languages Known:** English, Hindi, Telugu
- **Location:** Hyderabad, Telangana, India

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
